GENERAL DATA PROTECTION REGULATION

GDPR Introduction course

Learn the changes in data protection legislation and the key requirements of the GDPR, including changes following Brexit. This short course is ideal if you want the convenience of studying online, on a date and time to suit you.

Approx. 1 hour

Training level **-** Introduction

Who should attend this course?

- This GDPR Introduction course is designed for anyone involved in processing, or with access to, personal data.
- The online course is perfect for organisations that require GDPR training for staff as part of an induction program for new employees, or to ensure existing employees have consistent training.

What will delegates learn on this course?

- A summary of the General Data Protection Regulation
- Why data protection laws have changed
- Data protection principles
- Data protection rights
- The role of the DPO (Data Protection Officer)
- Subject Access Request explained
- The importance of handling personal data correctly
- The implications of data breaches

What is the format of this course?

- This online GDPR course consists of a training module with 10 interactive lessons in the form of presentations, videos, animations, engaging activities, and a quiz. The bite-size lessons are approx. 6 minutes each so can easily be completed around other commitments.
- Anyone booking this online course will have access for 30 days.

What is the course assessment?

- Delegates will be assessed via a short online quiz at the end of the lessons.

What certificate is provided?
- A Batatas certificate

What equipment is required for this online course?

- No specialist software is required for the GDPR course, delegates just need access to an internet-connected device (desktop, laptop, tablet or mobile) with audio equipment (headphones/speakers).

This course has the following learning styles available:

Online
self-paced
